Winemakers and science combine forces in Tasmanian project to find key to better bubbly

The $1.43 million project conducted by the Tasmanian Institute of Agriculture, funded by Wine Australia with in-kind support by Central Science Laboratory and several winemakers, is studying different techniques to speed up the maturation process and improve its quality, which could save winemakers time and money.

Major Wine Producing Countries

Argentina 2018 vintage: Good news for producers with a return to ‘normality’

Production is up 30% compared to last year, according to early statistics from the National Viticulture Institute (INV), with the total crush so far standing at 2.5 million kilograms of grapes this year compared to 1.9m last year, and 1.7m in 2016.
