Global Trends - Wine Industry Key Elements

HOW DOES SA GET WINE PRICES UP?

For all the massive strides made in quality improvement in the last two decades or so, the fact that South African wine prices remain depressed in a global sense must be put down to unrealized potential.

‘Temperature crisis’ could lead to a major re-shuffle of global wine production and demand

Vinegrowing and winemaking worldwide could look very different in the next 30 years, a climate change expert has announced, as the planet accelerates towards a temperature crisis fifty years earlier than expected.
