Global Trends - Wine Industry Key Elements

Researchers map out world’s winegrape varieties

University of Adelaide researchers have compiled statistics from 44 countries to develop the first database of the world’s winegrape varieties and regions.

The new database, funded by the Grape and Wine Research and Development Corporation (GWRDC), provides an in-depth analysis of the world's wine varieties and winegrape growing nations that account for 99% of global wine production.

The database is available online at: www.adelaide.edu.au/wine-econ/databases/winegrapes and an e-book can be freely downloaded at: www.adelaide.edu.au/press/titles/winegrapes
