After Brexit: Jean-Claude Juncker sets five paths for EU’s future

European Commission President Jean-Claude Juncker has revealed his five future "pathways" for the European Union after Brexit.

Path one: 'Carrying on'
Path two: 'Nothing but the single market'
Path three: 'Those who want to do more'
Path four: 'Doing less, more effectively'
Path five: 'Doing much more together'

Natural / Physical Resources

SA Wine Industry Natural Resource Guidelines

The effective and efficient use of natural resources such as energy and water within the farming and wine cellar environment are of paramount importance. Over the years various guidelines have been compiled which are now available on the Green Agri Portal.

To view these guidelines go to www.greenagri.org.za and click on Tools & Tips and Projects & Research.

Comment: The Resource Working Group (a sub-group of the Wine Industry Value Chain Round Table) continuously addresses initiatives relating to the above.

Die effektiewe en doeltreffende gebruik van natuurlike hulpbronne soos water en energie binne die boerdery en wynkelder omgewing is van die allergrootste belang. Oor die jare is verskeie riglyne opgestel wat nou op die Groen Agri Portaal beskikbaar is.

Kommentaar: Die Hulpbron Werkgroep (‘n sub-groep van die Wynbedryf Waardeketting Tafelronde) spreek voortdurend inisiatiewe aan wat met die bogenoemde verband hou.
