2008 GRAPE AND WINE HARVEST AND SALES

The 2008 wine grape harvest is estimated at 1 357 597 tons according to the industry's (producer cellars and viticulturists) estimate on 7 March 2008 (page 2), a slight decrease from the February estimate. This is about 0.5% more than the 2007 harvest. It is expected that the 2008 wine harvest, including grape juice concentrate and grape juice, wine for brandy and distilling wine, will amount to 1 053,5 million litres at an average recovery of 776 litres per ton of grapes (page 3). Please note that the import figure for distilling wine has been adjusted downwards as the indications are that the domestic distilling wine production will almost be in line with the market requirement.

A slight decrease in the estimate since February is expected in the Orange River, Little Karoo, Robertson, Stellenbosch and Worcester areas, mainly as a result of the heat and untimely rain accompanied by rot. This precarious weather conditions resulted in high fungal disease pressure which are still continuing in the late season. Effective spraying programs by producers reduced the harvest losses, without a doubt.

Increases are expected in the Olifants River, where the Chenin Blanc harvest was higher than initial estimates, as well as in Malmesbury and Paarl. Producers in all the other regions are positive about a harvest of good quality.

Also in this issue – domestic sales of natural wine during January 2008 (page 4), information regarding the price ranges in which wine were sold in bulk for the period January 2008 (pages 5 to 8), exports for the period February 2008 (pages 9 to 10), domestic packaged wine information for the period January to December 2007 (pages 11 to 19) and the volume of wine certified during February 2008 (page 20).

SAWIS greetings until April
